

Environmental issues

Many factors lead to climate change. The emphases on automobile use and the burning of fossil fuels have targeted every day drivers as a major contributor to this problem.

This assignment will help you to understand the individuals role in reducing the impact automobiles have on global warning.

You will **research a media source and bring to class a copy of your findings** as it pertains to the automobile and the environment.

You will also **come up with at least two driver-controlled solutions** to this problem.

This assignment is worth 5 marks and must be presented in session eight.
